

1. Instead of this chart, we can add form

Form Details :

1. Full Name
2. Contact Number (Only Number wala)
3. Website
4. Monthly Ad spend

In Option

1. 0 - 50,000
2. 50,000 - 1,00,000/-
3. 1,00,000 - 2,00,000/-
4. 2,00,000 - 5,00,000/-
5. CTA - Submit Form

2. Make this strip running

Need to paste this somewhere

3. Leah Model (This should be operation like the reference one)

◆ THE 15-MINUTE AUDIT

Give me 15 minutes. I'll show you where your ads are losing money.

We'll look beyond surface-level metrics and identify the biggest opportunities across your campaigns, creative, funnel, tracking, and conversion flow.

Get My 15-Minute Audit →

No long sales presentation. Just the problems, priorities, and what we'd fix first.

4. Create like this

Different businesses. Same objective.

Turn ad spend into profitable customers.

E-commerce

Lead Generation

Qualified pipeline, not cheap form fills.

Cost per lead is the easiest number to improve and the easiest to fool yourself with. We optimise against what the sales team can actually close.

SEARCH INTENT

LANDING PAGE CVR

LEAD QUALITY

Demand capture

27%

Nurture / retarget

15%

ILLUSTRATIVE FIGURES - REPLACE WITH ACCOUNT DATA

5. Create like this : the button E-commerce & lead Gen should be clickable (it changes data on clicking)

SCOPE

What we actually fix.

Four systems, one economic outcome. Open any module to see the specific problems we look for.

01 Paid Media

Account structure, budget logic and scaling discipline.

+

02 Creative

The variable with the largest effect on cost per result.

+

03 Conversion

Where paid traffic stops being potential revenue.

+

04 Data

If the measurement is wrong, every decision after it is too.

+

6. Then add this

01 Paid Media

Account structure, budget logic and scaling discipline.

×

Meta Ads

Google Ads

Campaign structure

Budget allocation

Audience strategy

Search terms

Scaling

WHAT WE LOOK FOR

Budget concentrated in campaigns that never proved efficiency

Overlapping audiences competing in the same auction

Search term waste hidden behind acceptable account averages

Scaling attempts that break a structure never built to hold spend

02

Creative

×

The variable with the largest effect on cost per result.

Creative strategy

Hooks

Ad angles

Testing systems

Creative fatigue

WHAT WE LOOK FOR

- ♦ One winning angle carrying the entire account
- ♦ Iteration without a hypothesis — new edits, same idea
- ♦ Frequency climbing while CTR quietly decays
- ♦ No system to promote or retire creative on evidence

03

Conversion

×

Where paid traffic stops being potential revenue.

Landing pages

Shopify / e-commerce funnel

CRO

Offer positioning

Checkout issues

WHAT WE LOOK FOR

- ♦ Ad promise and landing page message that do not match
- ♦ Checkout or form steps that lose users at a measurable point
- ♦ Offer positioning that competes on price by accident
- ♦ Mobile experience materially worse than desktop

04

Data

×

If the measurement is wrong, every decision after it is too.

Tracking

Attribution

GA4

Pixel / CAPI

Reporting

Lead quality feedback

WHAT WE LOOK FOR

- ♦ Duplicate or missing conversion events inflating reported results
- ♦ Pixel and CAPI disagreeing with the platform of record
- ♦ No feedback loop from CRM outcomes back into optimisation
- ♦ Reporting that measures activity instead of profit

Questions worth asking.

What does the 15-minute audit include?	+
Do you work with e-commerce and lead generation?	+
Do you manage Meta and Google Ads?	+
Do you also help with landing pages and CRO?	+
What ad spend level do you typically work with?	+
Do you work internationally?	+
How do you measure success?	+
How quickly can we start?	+
Do you guarantee results?	+

7. Add this

8. Sticky Free audit on the website
